Affiliate Member Sightlines Issues Report on Higher Education Facilities

Most higher education analysts agree that the next 10 to 15 years will bring significant shifts to the delivery of education and learning environments at colleges and universities. In light of these current and future changes, Sightlines believes there needs to be a new dialogue around facilities on campuses, as facilities leaders will continue to be called upon to do more with less. (all text below is not in the newsletter format)

The Sightlines’ 2014 State of Facilities in Higher Education report identifies the root causes of the increase in facilities expenditures, provides insights into the challenges of balancing the budget, and shares innovative solutions underway at many institutions across the country.

Topics covered included:
• Five strategies for success
• Why funding source matters
• How the waves of campus construction impact space, density and funding
• The changing age profile of campus facilities
• Capital investment over time
• Operations effectiveness
• Growth of backlogs
• Energy usage
